

# D-Desinfekt

Touchless, sensor-controlled disinfection dispensers have become indispensable since COVID-19.

Highlight your safety measures with moving images and combine them with advertisements. By monitoring the disinfectant consumption, you can even determine how many customers have been near the advertisement.

In combination with Countbird ([www.alphabird.at](http://www.alphabird.at)), you can use the display as a plug-and-play solution for people counting and entry restrictions, making it a versatile tool for managing customer flow

- Technical specifications and features:
- Panel: LCD Full HD 21.5" / 400 nit
- Media Player: Android 7.1 / 2GB + 8GB RAM RK 3288 Touch-display
- Robust metal body
- Suitable for freestanding or wall mounting.
